

AI Project

Professor Patrick GLAUNER

Department of Applied Computer Science,
Deggendorf Institute of Technology

patrick.glauner@th-deg.de

2022 Summer Term

Aims and objectives of this class

- Implementing high-tech projects in the fields of artificial intelligence, machine learning, computer vision, natural language processing and others
- Using modern high-end hardware, such as GPU clusters and cloud services
- Utilizing an agile process framework such as Scrum
- Understanding and using modern industrial software development tools such as work package trackers, code revision systems, debuggers, profilers and others
- Presenting R&D outcomes to stakeholders at different levels, such as fellow students, faculty members and practitioners, executives

Prerequisites

- Artificial intelligence
- Programming
- (Some) mathematics
- Ask for help in class!

Scrum

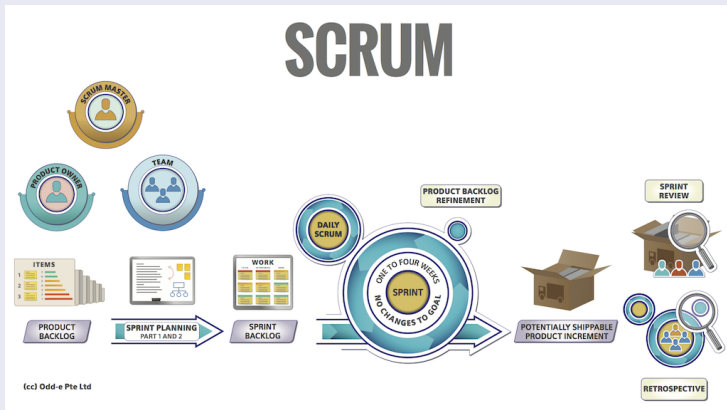

Figure: Scrum stakeholders, artifacts and sprints^a.

^aSource: <http://github.com/jvandemo/github-scrum-workflow>

How do you handle the following tasks?

- Keeping track of your code changes
- Reverting changes
- Working with others on the same code
- Independently developing multiple features

Background

Revision control

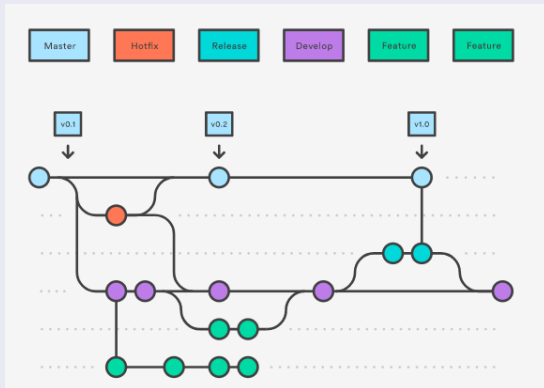

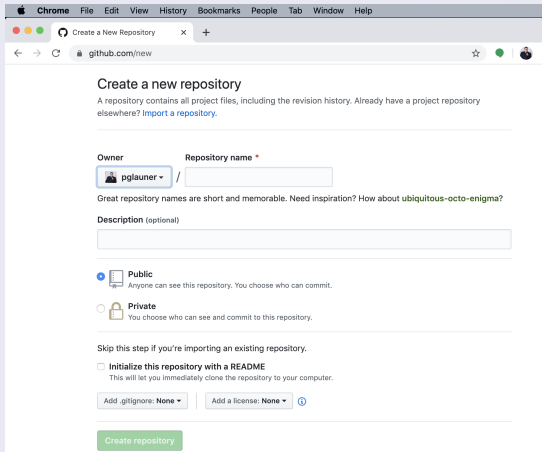

Figure: Branches^a.

^aSource: <http://hackernoon.com/how-we-transitioned-from-traditional-agile-to-agile-ci-cd-2ef9b7af5bf0>

Popular source code revision control systems

- Git
- Mercurial
- Subversion
- ...

Github

The screenshot shows the 'Create a new repository' page on GitHub. The browser is Chrome, and the URL is `github.com/new`. The page title is 'Create a new repository'. Below the title, a subtitle explains that a repository contains all project files and revision history. The form includes an 'Owner' dropdown menu set to 'pglauner', a 'Repository name' text input field, and a 'Description (optional)' text area. There are two radio button options for repository visibility: 'Public' (selected) and 'Private'. Below these, there is a checkbox for 'Initialize this repository with a README'. At the bottom, there are two buttons: 'Add .gitignore: None' and 'Add a license: None'. A green 'Create repository' button is at the very bottom.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner: pglauner / Repository name:

Great repository names are short and memorable. Need inspiration? [How about ubiquitous-octo-enigma?](#)

Description (optional):

☒ **Public**
Anyone can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☐ **Initialize this repository with a README**
This will let you immediately clone the repository to your computer.

Add .gitignore: None | Add a license: None ⓘ

[Create repository](#)

Musterhaus Wolf

Osterhofen

Am Stadtwald 20, 94486 Osterhofen

Aktuell sind **keine** Besichtigungen möglich.

Musterwohnung Erl

Deggendorf

Oberer Stadtplatz 18, 94469 Deggendorf

Aktuell sind **keine** Besichtigungen möglich.

Possible use cases

- Detect high blood pressure
- Detect overweight
- Detect cardiovascular diseases
- Detect lack of sleep
- Investigate data quality and do data cleansing
- ...

Workload:

- 1.5 hours (90 minutes) of laboratory sessions per week
- 5 ECTS
- Equivalent to 150 hours
- A term takes 15 weeks
- This makes approximately **another 8.5 hours per week** for working on your project, doing background readings, preparing presentations, etc.

Next steps

Schedule (1)

This week:

- Kickoff (with Home 4.0)
- Choose a product owner.
- Choose a scrum master (who should also contribute to the implementation).

Next steps

Schedule (1)

This week:

- Kickoff (with Home 4.0)
- Choose a product owner.
- Choose a scrum master (who should also contribute to the implementation).

Next week:

- More details, Q&A (with Home 4.0)

Next steps

Schedule (1)

This week:

- Kickoff (with Home 4.0)
- Choose a product owner.
- Choose a scrum master (who should also contribute to the implementation).

Next week:

- More details, Q&A (with Home 4.0)

In two weeks:

- Review and present the state of the art of modern home care using AI
- Access data and do initial exploratory data analysis (EDA) (with Home 4.0).
- Present your roadmap for the remainder of the term (with Home 4.0).
- ...

Schedule (2)

Next:

- Start your first iteration (do at least two iterations!)
- We will have a weekly Scrum meeting in which you summarize what has happened in the previous 7 days.
- We will discuss any open questions, issues, impediments, etc.

Score

Category	Maximum
Review of related work	10
Methodology and results	15
Initiative and continuity	15
Professional software development approach	10
Total	50

Examination

Score

Category	Maximum
Review of related work	10
Methodology and results	15
Initiative and continuity	15
Professional software development approach	10
Total	50

Note

All members of a team are supposed to get the same mark. Those who do not commit to the project may get a different mark though.

Mark (1)

Your temporary mark is computed as follows:

$$\text{Temporary Mark} = \frac{60 - \text{Score}}{10}.$$

Mark (2)

Score	Temporary Mark	Final Mark
50	1.0	1.0
49	1.1	1.0
48	1.2	1.0
47	1.3	1.3
46	1.4	1.3
45	1.5	1.3
44	1.6	1.3
43	1.7	1.7
42	1.8	1.7
41	1.9	1.7

Mark (3)

Score	Temporary Mark	Final Mark
40	2.0	2.0
39	2.1	2.0
38	2.2	2.0
37	2.3	2.3
...
21	3.9	3.7
20	4.0	4.0
0-19	-	5.0 ^f

Legend:

^f: Fail.
